PRODUCT GALLERY

PRODUCTS & SERVICES

STRINGER PALLETS: -

Stringer pallets have three longer pieces of wood to support the sides and middle of the parallel boards. These are generally 2-way pallets, because a forklift can only pick them up two different ways.

TWO-WAY PALLETS: -

Two-way pallets allow forklift entry from the front and the rear of the pallet. They are constructed with stringers. The ability to enter the pallet from only 2 entry points with the forklift can be a conundrum when it comes to stacking and space allocations
